

Ready2Talk

Important Headset Information

Every once in a while we receive questions about Ready2Talk headsets, how to wear them and how to best care for them. We hope this answers your questions.

How do I put them on my head?

Here's the trick, the metal headband is designed to go behind your head (not over top) and the curved parts of the headband rest on top of your ears. If it's still too loose or too tight, just bend the width of the metal headband in or out. Don't worry they're tough.

Where do I put the mic foam piece?

First things first... you **MUST** have a foam sock on your headset, if not, it will sound terrible!

Place the mic pick up about 1" (3cm) away from your mouth and talk normally. Then adjust the volume on your stereo to the correct level. If the mic pick up is too far away the stereo will have to be turned up too much and then you might have feedback issues.

IMPORTANT !!!

Please note the bump on the mic socket mates with the corresponding slot on the mic plug to ensure that the 4 pin mic plug is being inserted in the correct position. Failure to do so **WILL cause irreparable damage to the microphone. Do not force it!**

Just follow these steps and you'll be Ready2Talk. If you have any questions or want a digital copy of this for your staff, just drop us a note or give us a call. 1 888 724-5351
