

Fleet Management Best Practices

Quick 1, 2, 3's for Every Fleet

Here are the key 1, 2, 3's for any Transportation or Tourism Fleet with multiple drivers.

1) Standardization

Wouldn't it be great if you no longer needed different mics for different vehicles?

Our main goal at Ready2Talk is to offer fleets a single mic standard for all their vehicles, no matter if they are vans, mini busses, trams, trolleys, or motorcoaches. We make both preamp and amplified PA Systems and Microphone Conversion Boxes to update your existing systems to our mic standard.

Once you upgrade to Ready2Talk, you use one mic standard all reasonably priced, from hand mics and headsets, wired or wireless, all plug and play with no modifications required. Standardizing saves time and money!

2) How many mics?

At first glance, it would seem cheapest to have one mic per vehicle, but many of our established customers have benefitted by supplying each of their drivers with their own mic / headset.

They found the drivers took ownership, which dramatically reduced the number of lost or damaged mics, saving time, money. Surprisingly, there was also a significant drop in sick days (reported as much as 30%), saving daily management stress.

Although it might seem counter intuitive, in the long run it is cheaper to outfit each staff member with their own mic. We offer bulk discounts, but don't forget to stock a couple spares... just in case.

3) Support

Once you standardize your fleet with Ready2Talk, you now you have full support as we service all our products, both in and out of warranty, even our mics.

So when you need to talk from front to back, back to front or both, Ready2Talk will be there to answer all your questions and support you every day.

We supply directly to most vehicle manufacturers and work closely with many influential fleets, Disneyland, Grayline, Holland America, Pink Jeep, Roberts Hawaii, Xanterra and many more, and we'd love to earn your business too. When you're Ready2Talk, please just give us a call.

Cheers,

The Ready2Talk Team
